

Post-Graduate (PG), Under -Graduate (UG), PG Diploma/Diploma and Certificate Programmes from reputed Indian Universities over Pan-African e-Network through Tele-Education mode

Pan-African e-Network Project is a joint initiative of the Govt. of India and African Union and is funded by the Govt. of India at an estimated cost of US\$116 Million. It aims at imparting education to 10000 students of African countries participating in the project, using modern information communication technologies, from some of the topnotch universities of India. The eligible students enrolled in various programmes will be required to attend the classes in the learning centre set up in each member country as part of the project.

Post Graduate, Under Graduate, Diploma and Certificate programmes in the field of **management – business and finance, engineering, & technology, computer science & information technology, international languages (viz. English, French, Germany and Arabic)** are available from the Indian universities, viz. Indira Gandhi National Open University, (IGNOU) New Delhi, AMITY University, Noida (Nr. Delhi), Birla Institute of Technology and Science (BITS), Pilani, University of Delhi, New Delhi and University of Madras , Chennai.

Information regarding the course content, eligibility criteria, duration of the programmes offered is made available on the website – www.panafricanenetwork.com.

Learning centres would connect to the specific Indian university as per pre-defined lecture schedule available at the Tele-Education portal. Highly experienced faculty shall deliver the live, interactive lectures from the Tele-education studio set up of the respective Indian universities. A unique feature of the tele-education system in the project is the offline access to the lecture contents stored in the database at the Datacentre , through internet for review learning.

Special features of Tele-education

- Dedicated IP based network
- Live, interactive virtual classes
- Offline access (through Internet) to the archived lecture contents for review learning – a unique feature of the tele-education system over this network
- Digital library
- Dedicated Tele-Education portal for knowledge management
- Fat track On-line admission process
